**Project:** Multilingualism and Creativity

---

**Subject:** The project aims to improve as much as possible the training of kindergarten teacher, basically developing a deep sense of belonging to European Union. In addition, this experience will give teachers the most suitable tools to the new European teaching formats. It is just with an adequate training of staff and school teachers that we can carry out a proper dissemination throughout the local territory involving children, families and the citizens.

In particular teachers and staff will get language skills suitable to their educational and pedagogical sector.

The main activities of SERN (Sweden Emilia-Romagna Network) network in the educational field are focused on developing a life-long learning ability capabilities. In this last years was created a network called CREANET which is responsible of the fulfilling and oversee over the exchange of kindergarten teacher of Emilia-Romagna and those of other European members directed towards creativity issues.

The Swedish Municipality of Norrköping runs 3 nursery schools that will host our teachers and staff; the above quoted kindergarten schools, working together with the local University, sustain an advanced educational paths of Swedish teachers on outdoor education. The expertise acquired from these methods of education, shared and acquired throughout the project activities, are the objects that are expected to be implemented in kindergarten schools of Emilia-Romagna.

Equally some kindergarten schools of Ravenna will host teachers from the Institute of Norrköping and the main purpose of the project will be to build a concrete exchange at methodological, organizational and educational level to develop a more and more modern and innovative system in the education of preschool children.
